## **Automatic Java Code Generator for Regular Expressions and Finite Automata** Suejb Memeti

Programming and resolving problems within automata theory is a complex process, which is time consuming and still the results may not be reliable (because of the great possibility to make mistakes while doing the required traversing steps). This project is an introduction of a tool that automatically generates Java Source Code for a given RE or Finite Automata, which significantly reduces complexity and increases productivity in a very short time. This is also a learning process tool, that can be used as a starting point to better understand the automata theory.

Regular Expression Code Generator tool provides support for auto generating Java code for programming and executing (deterministic) finite automata. It takes as input a regular expression and converts it into an equivalent nondeterministic and deterministic finite automaton, then automatically generates Java Source Code with the implementation of the DFA for the given RE.

Regular Expression Code Generator is an interactive software for visualizing finite automata, and converting these automata in Java executable Source Code in a quick, fast and effective way.

It can be found very helpful tool within any course in Automata Theory or some Compiler courses. We intend Regular Expression Code Generator to be used by Students, Teachers and Programmers. For students it will be a good starting point to better understand RE, FA and how these FA are implemented in Java in different ways. For teachers it will be a perfect tool to check and correct student's assignments. Programmers could find it very useful to generate source code in a quick and fast way providing accessibility, performance, and improved programmer productivity while reducing time consumption.

### **From reader reviews:**

#### **Michael Floyd:**

The book Automatic Java Code Generator for Regular Expressions and Finite Automata can give more knowledge and also the precise product information about everything you want. So why must we leave a good thing like a book Automatic Java Code Generator for Regular Expressions and Finite Automata? Several of you have a different opinion about guide. But one aim in which book can give many information for us. It is absolutely right. Right now, try to closer with the book. Knowledge or details that you take for that, you could give for each other; you can share all of these. Book Automatic Java Code Generator for Regular Expressions and Finite Automata has simple shape however you know: it has great and big function for you. You can seem the enormous world by open and read a publication. So it is very wonderful.

#### **Evelyn Nielson:**

Here thing why this Automatic Java Code Generator for Regular Expressions and Finite Automata are different and reliable to be yours. First of all looking at a book is good but it really depends in the content of it which is the content is as delicious as food or not. Automatic Java Code Generator for Regular Expressions and Finite Automata giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with Automatic Java Code Generator for Regular Expressions and Finite Automata. It gives you thrill studying journey, its open up your own eyes about the thing that will happened in the world which is probably can be happened around you. It is easy to bring everywhere like in playground, café, or even in your technique home by train. If you are having difficulties in bringing the imprinted book maybe the form of Automatic Java Code Generator for Regular Expressions and Finite Automata in e-book can be your alternate.

#### **Bonnie Thorp:**

The book untitled Automatic Java Code Generator for Regular Expressions and Finite Automata is the book that recommended to you to read. You can see the quality of the e-book content that will be shown to you. The language that creator use to explained their way of doing something is easily to understand. The copy writer was did a lot of exploration when write the book, so the information that they share to you personally is absolutely accurate. You also might get the e-book of Automatic Java Code Generator for Regular Expressions and Finite Automata from the publisher to make you more enjoy free time.

#### **Pierre Winter:**

E-book is one of source of know-how. We can add our understanding from it. Not only for students and also native or citizen want book to know the upgrade information of year in order to year. As we know those guides have many advantages. Beside all of us add our knowledge, can also bring us to around the world. From the book Automatic Java Code Generator for Regular Expressions and Finite Automata we can get more advantage. Don't you to be creative people? To become creative person must prefer to read a book.

Only choose the best book that acceptable with your aim. Don't be doubt to change your life with this book Automatic Java Code Generator for Regular Expressions and Finite Automata. You can more desirable than now.
