"The Watchmaker's Son" is an autobiographical novel about a driven otolaryngologist-head and neck surgeon who experienced loss of his parents as a youth growing up in the Bronx. This led him in part, to focus on academics rather than emotion as he began a successful career. However, in adulthood, following the sudden death of his older brother and fighting his own heart disease, he changed his life to better grow as a person and more holistically serve his patients with TMJ problems related to bruxism, or clenching the teeth. As a result, he lost his wife, his reputation and his livelihood while fighting false accusations of sexual misconduct. This novel takes the reader behind the scenes of this high powered surgeon's difficult professional and personal life to understand the stresses and pressures that can make some men break. While he never broke, he cracked. But he sought answers and, Phoenix-like, rose from the ashes of what could have been his early demise, to help others lead better lives. In the process he became a better person, puts the demons of his childhood to rest so that he could get on with his life, and eventually got the personal happiness that eluded him for so many years. My book is the first one that deals with these issues since the book "A Taste of My Own Medicine" by Dr. Edward Rosenbaum and later made into the movie "The Doctor. In my book, I am an ENT Surgeon with a severe cardiac problem and in his book, he is a cardiologist with a severe ENT problem. In many ways I believe that my story is even more powerful dealing with both very serious medical and legal issues.
