This book is where your adventures with Bluetooth LE begin. You'll start your journey by getting familiar with your hardware options: Arduino, BLE modules, computers (including Raspberry Pi!), and mobile phones. From there, you'll write code and wire circuits to connect off-the-shelf sensors, and even go all the way to writing your own Bluetooth Services. Along the way you'll look at lightbulbs, locks, and Apple's iBeacon technology, as well as get an understanding of Bluetooth security--•both how to beat other people's security, and how to make your hardware secure.

From reader reviews:

Richard Segers:

Reading a book can be one of a lot of action that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new data. When you read a e-book you will get new information since book is one of numerous ways to share the information or even their idea. Second, examining a book will make an individual more imaginative. When you studying a book especially fiction book the author will bring that you imagine the story how the personas do it anything. Third, it is possible to share your knowledge to other people. When you read this Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones, you can tells your family, friends and soon about yours guide. Your knowledge can inspire the others, make them reading a publication.

Ruth Aguilar:

A lot of people always spent their own free time to vacation or perhaps go to the outside with them family members or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity that's look different you can read a book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent the whole day to reading a guide. The book Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones it is rather good to read. There are a lot of people that recommended this book. They were enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore simply to read this book from the smart phone. The price is not very costly but this book has high quality.

Howard Benedict:

Exactly why? Because this Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones is an unordinary book that the inside of the guide waiting for you to snap that but latter it will zap you with the secret this inside. Reading this book next to it was fantastic author who write the book in such incredible way makes the content inside of easier to understand, entertaining method but still convey the meaning completely. So , it is good for you for not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of gains than the other book include such as help improving your proficiency and your critical thinking method. So , still want to hesitate having that book? If I were being you I will go to the publication store hurriedly.

Iona Calhoun:

Your reading 6th sense will not betray anyone, why because this Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones book written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written within good manner for

you, leaking every ideas and producing skill only for eliminate your current hunger then you still uncertainty Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones as good book not simply by the cover but also from the content. This is one book that can break don't evaluate book by its cover, so do you still needing one more sixth sense to pick this!? Oh come on your looking at sixth sense already alerted you so why you have to listening to yet another sixth sense.
