**Petrochemical Economics: Technology Selection in a Carbon Constrained World (Catalytic Science Series) (Catalytic Science (Imperial College Press))** Duncan Seddon

This compendium gives an overview of the technologies and economics in the production of olefins in the petrochemical industries. It highlights the options and costs for producing olefins using different technologies and different feedstocks at a time when the cost of carbon dioxide emissions are set to be included in the production cost. Industry professionals, engineers, research scientists and financiers will find this title a valuable resource.
