MODUS - Generation of Interfaces based on Models Marina Machado

The user interface is essential for making a successful application. Nonetheless, studies have shown that a large percentage of the software development effort can be dedicated to the interface, which is not a sustainable solution. The software industry invested in the creation of development tools to overcome this issue. There was a particular interest in model-based methodologies, since they reuse artefacts of the application's development to automatically create the interface. However the automation on these methodologies tend to have a negative impact on the interface and its implementation. The MODUS (Model-based Developed User Systems) approach is a solution for this problem. Its main premise is to assume that, for specific domains, the interface can be built from a description of the application data. The business models allow the creation of solid skeletons for the interface, which can be iteratively refined by the designer. The prototype was tested and proved to increase the efficiency, accuracy and quality of the interface implementation. From the computer engineer to the user interface enthusiast, MODUS may be your solution for a faster and easier interface development.

From reader reviews:

Evelyn Spencer:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite book and reading a publication. Beside you can solve your condition; you can add your knowledge by the publication entitled MODUS - Generation of Interfaces based on Models. Try to make the book MODUS - Generation of Interfaces based on Models as your good friend. It means that it can to become your friend when you really feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know almost everything by the book. So , let us make new experience and knowledge with this book.

Deborah Browning:

The book MODUS - Generation of Interfaces based on Models gives you the sense of being enjoy for your spare time. You should use to make your capable considerably more increase. Book can being your best friend when you getting pressure or having big problem along with your subject. If you can make reading a book MODUS - Generation of Interfaces based on Models to get your habit, you can get more advantages, like add your own capable, increase your knowledge about some or all subjects. You could know everything if you like start and read a reserve MODUS - Generation of Interfaces based on Models. Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this e-book?

Jacki Peters:

As we know that book is vital thing to add our knowledge for everything. By a guide we can know everything we want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This book MODUS - Generation of Interfaces based on Models was filled concerning science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading a new book. If you know how big benefit from a book, you can experience enjoy to read a book. In the modern era like right now, many ways to get book you wanted.

Thomas Hill:

A lot of reserve has printed but it is different. You can get it by net on social media. You can choose the top book for you, science, amusing, novel, or whatever through searching from it. It is called of book MODUS - Generation of Interfaces based on Models. You can add your knowledge by it. Without making the printed book, it could add your knowledge and make a person happier to read. It is most essential that, you must aware about reserve. It can bring you from one destination to other place.
