An effective administrator must not only have the educational background to understand the foundational basis for the system, but must also be guided by the vision and mission of the organization. **Juvenile Justice Administration** illustrates through examples and interviews with juvenile justice administrators and other personnel how these organizations and agencies function and provides a comparative analysis of juvenile justice systems across countries and continents.

Using a plethora of case studies to demonstrate the issues presented, the book examines:

- The historical origins and goals of the juvenile justice system
- The tasks performed by juvenile justice administrators
- Management theories and administrative models such as the human relations approach, the social systems approach, and organizational models
- Juvenile justice personnel and administrative agencies serving endangered children
- Laws pertaining to juvenile offenders and children at risk
- Police and juvenile justice issues in the United States, Canada, Japan, Austria, and South Africa
- Probation, parole, community-based sanctions, and correctional facilities for juvenile offenders

The book also explores future trends in juvenile justice administration. As the system increasingly shifts from a punishment-oriented model to a restorative justice approach, this book provides administrators with sufficient background on the topic as well as insight into innovative policies and procedures that may prove advantageous to their communities.
