Surviving the Century: Facing Climate Chaos and Other Global Challenges

Surviving the Century: Facing Climate Chaos and Other Global Challenges

Environmental and human catastrophe looms ever larger for planet Earth. Powerful action is required now to turn a deepening global crisis into an unprecedented opportunity for positive change. This book shows how a dramatic transformation of how humans relate to the Earth, and to one another, can be achieved. Surviving the Century is the first major publication by the World Future Council (WFC), a new international voice for future generations. Reflecting the positive mission of the WFC, each chapter addresses a different critical issue in a systematic and constructive way, describing and analysing the topic before indicating real solutions. The eight main issues covered are: countering climate chaos, renewable energy policy, local farming systems, rainforests and climate change, creating sustainable cities, cradle to cradle production systems, a radical vision for trade and creating a living democracy. Surviving the Century is a must-have primer and action plan for all leaders in government, business and NGOs, and for all who want to be part of the historic opportunity to provide solutions to the greatest challenge humanity has ever faced. Published with the World Future Council.
