New Jersey proves that small can be beautiful. Although the state ranks third from last in size, it is physically diverse, containing four major landscape regions. Prolific nature photographer Tom Till teams up with Rutgers earth scientist Alexander Gates to create the definitive portrait of natural New Jersey. Over the course of an eighteen-year campaign, Till has probed every nook of the state in his search for New Jersey's most scenically alluring landscapes and naturally significant preserves. The book's 200 color photographs, representing every one of the state's 21 counties, are organized by landscape regions into chapters, each with its own map and an authoritative but accessible commentary by Gates, one of New Jersey's best-known public educators. He opens the book with a fascinating account of the evolving interaction between New Jersey's natural and human histories.
