Pitfalls and Complications in the Diagnosis and Management of Hepatobiliary and Pancreatic Diseases: Surgical, Medical and Radiological

Pitfalls and Complications in the Diagnosis and Management of Hepatobiliary and Pancreatic Diseases: Surgical, Medical and Radiological

International experts delineate the individual stumbling blocks leading to errors and pitfalls in the diagnosis and management of hepato-biliary and pancreatic diseases. The most important and original aspect is the section describing each expert's personal techniques for the management of the complications resulting from the errors and pitfalls associated with hepato-biliary and pancreatic disease. Examples of problems this book helps identify and solve: outlines the problem of vascular injury during liver resection, and explains how to repair damage to the inferior vena cava, portal vein, hepatic artery or the hepatic veins; identifies complications occurring during PTC and ERC, and specifies how to treat them; identifies problems which can occur during pancreatic resectional surgery, and describes specific actions which must be taken.
