Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) Stephen Levinson, Don Davis, Scot Slimon, Jun Huang

This book addresses the problem of articulatory speech synthesis based on computed vocal tract geometries and the basic physics of sound production in it. Unlike conventional methods based on analysis/synthesis using the well-known source filter model, which assumes the independence of the excitation and filter, we treat the entire vocal apparatus as one mechanical system that produces sound by means of fluid dynamics. The vocal apparatus is represented as a three-dimensional time-varying mechanism and the sound propagation inside it is due to the non-planar propagation of acoustic waves through a viscous, compressible fluid described by the Navier-Stokes equations.

We propose a combined minimum energy and minimum jerk criterion to compute the dynamics of the vocal tract during articulation. Theoretical error bounds and experimental results show that this method obtains a close match to the phonetic target positions while avoiding abrupt changes in the articulatory trajectory. The vocal folds are set into aerodynamic oscillation by the flow of air from the lungs. The modulated air stream then excites the moving vocal tract. This method shows strong evidence for source-filter interaction.

Based on our results, we propose that the articulatory speech production model has the potential to synthesize speech and provide a compact parameterization of the speech signal that can be useful in a wide variety of speech signal processing problems.

Table of Contents: Introduction / Literature Review / Estimation of Dynamic Articulatory Parameters / Construction of Articulatory Model Based on MRI Data / Vocal Fold Excitation Models / Experimental Results of Articulatory Synthesis / Conclusion

From reader reviews:

Kurtis Henry:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a walk, shopping, or went to the particular Mall. How about open or perhaps read a book allowed Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing)? Maybe it is being best activity for you. You realize beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have various other opinion?

Debra Espiritu:

Do you one of people who can't read satisfying if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) book is readable simply by you who hate those perfect word style. You will find the facts here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to supply to you. The writer of Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) content conveys prospect easily to understand by most people. The printed and e-book are not different in the content material but it just different by means of it. So , do you even now thinking Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) is not loveable to be your top checklist reading book?

Dwight McBride:

This book untitled Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) to be one of several books in which best seller in this year, this is because when you read this e-book you can get a lot of benefit in it. You will easily to buy that book in the book retailer or you can order it via online. The publisher of the book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smartphone. So there is no reason for your requirements to past this reserve from your list.

Joseph Carter:

Beside this Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on Speech and Audio Processing) in your phone, it can give you a way to get more close to the new knowledge or information. The information and the knowledge you will got here is fresh through the oven so don't end up being worry if you feel like an outdated people live in narrow small town. It is good thing to have Articulatory Speech Synthesis from the Fluid Dynamics of the Vocal Apparatus (Synthesis Lectures on

Speech and Audio Processing) because this book offers to you personally readable information. Do you sometimes have book but you would not get what it's about. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. So do you still want to miss the idea? Find this book in addition to read it from now!
