Environmental Impacts of Pasture-based Farming (Cabi) Richard McDowell

Focusing on the different types of pastoral farming and their impact on the environment, **Environmental Impacts of Pasture-based Farming** takes a broad view of the subject, whose treatment in texts is often biased towards confined animal or grain based systems. The text is organized into two sections, the first addressing issues facing environmental quality, namely soil, water and air quality and socio-economic impacts. The second section offers commentary on how pastoral sectors influence environmental issues.

With highly tuned farm productive systems comes the risk of environmental impacts, and the purpose of this text is to highlight the areas in which these risks are associated and how best to mitigate them. An approach is taken that highlights these problems, but also keeps in mind that mitigation may be too restrictive on the farming system and make farming impractical.
